DETAILED ACTION

Election/Restrictions

1.   Restriction to one of the following inventions is required under 35 U.S.C. 121:

   I.   Claims 1-6, drawn to a method of manufacturing yarn, classified in class

   57, subclass 282.

   II.   Claims 7-10, drawn to a woven fabric, classified in class 442, subclass

   189.

The inventions are distinct, each from the other because of the following reasons:

2.   Inventions I and II are related as process of making and product made. The

inventions are distinct if either or both of the following can be shown: (1) that the

process as claimed can be used to make other and materially different product or (2)

that the product as claimed can be made by another and materially different process

(MPEP § 806.05(f)). In the instant case the furniture fabric may be produced using

compound woven yarn rather than twisted yarn.

3.   Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.

4.   A telephone call was made to Jaiwei Huang on April 4, 2005 to request an oral

election to the above restriction requirement, but did not result in an election being

made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
